Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I Claims 1-11, 16, drawn to a distributed interactive content system to enable interactive content exchange, classified in class 709, subclass 228.

II. Claims 12-15, drawn to a process to facilitate the review of a directory of one or more objects, classified in class 709, subclass 204.

III Claims 17, drawn to a via link system for automatically identifying a source of posting of information, classified in class 715, subclass 501.1.

II The inventions are distinct, each from the other because of the following reasons: Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other they are shown to be separately usable. In the instant case, invention I has separate utility such as the transactional server establishes an interface among the users and the hosts. Invention II has separate utility such as enabling access via the summary description to a source of the summary description, invention III has separate utility such as a via link system for automatically identifying a source of posting of information. See MPEP. § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Chris A. Caseiro, attorney, on 4/5/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
